

SEQUENT

THE FUTURE OF WEARABLES TECHNOLOGY

August 31, 2020

BIG PROBLEM.

Solved

One of the biggest problems for smartwatches is their low battery life, which is primarily a function of the digital displays and the capabilities offered by the watch itself.

This has meant that smartwatches with digital displays not only have smartphone-like features, but also share the near daily charge cycles.

SUSTAINABILITY.

Make a better tomorrow

With our unique positioning in the watch and wearable market we decided to make the move to offset 100% of our production carbon footprint

For every watch produced our partner MyClimate plant a tree.
